SME and Delivery roles – Industry verticals

Energy & Manufacturing verticals

Position	Summary	Location	Apply or refer
Delivery and engagement manager – Energy vertical	For a NASSCOM top 10 IT services company. Lead delivery and client engagement for a portfolio of digital, app dev, and cloud development / migration programs with a very large Energy E&P company. It will be responsible for all programs and for governance, profitability, and CSAT. This is a new engagement, currently in the 25 – 50 FTE range. Given the size of the client, there is potential to scale this considerably – though in a competitive environment. This role will also play an active role in account mining. **Required experience -** A demonstrated track record of leading delivery, client engagement, CSAT, Governance and mining for digital, application development with Agile, & microservices. Experience in the Energy or contiguous manufacturing industry. Having led a global engagement of $ 8 - 10 million and over 50 - 100 resources globally. Strong technical credentials (vs. pure operations) especially in ADM & digital technologies. KRA's will be CSAT, governance and account mining.
